Summary

Highly motivated student at Politehnica University of Bucharest, specializing in Robotics with a focus on Applied Informatics. Proficient in Python, C++, C# .NET, HTML, CSS, and JavaScript, with four years of experience in C++ gained during high school and completed four-month courses in C# .NET, Python, HTML, CSS, and JavaScript. Passionate about exploring emerging technologies and dedicated to continuous learning. Actively seeking opportunities to apply knowledge and skills in a dynamic and innovative environment.

Work Experience

Junior Developer, TechWise Electronics, Pitesti, Romania

June 2024 - Present

I specialize in developing and programming robotic systems using their teach pendants and C++, Python and C# with their APIs. My expertise includes designing and implementing applications for various industrial processes such as pick and drop, palletizing, welding, and painting. Through my work, I ensure the optimization and efficiency of automated manufacturing systems, contributing to increased productivity and precision in operations.

Python Junior Developer, "Ion C. Bratianu" National College (Apprenticeship), Pitesti, Romania

October 2022 - May 2023

Collaborated within a high school team to develop a Python application aimed at generating quizzes encompassing various domains for fellow high school students. Led the development of the application, contributing to coding, testing, and implementation phases. Demonstrated strong teamwork, problem-solving, and programming skills while delivering a user-friendly and engaging educational tool.

Programming Tutor (Part-Time), Bucharest, Romania

July 2022 - Present

Provide tutoring sessions to ninth and tenth-grade students during spare time, specializing in instruction on the C++ programming language. Utilize efficient teaching methodologies to break down intricate concepts and enhance comprehension. Exhibit robust communication skills and patience while guiding students through their learning journey, fostering an encouraging and conducive learning atmosphere.
